

## Experience

Our experience in the area of manufacturing dates back forty years. During this time we have devoted our efforts to the racquet sports industry world wide. We have drawn on our 40 years of experience, expertise, extensive research and development, and our customer's input to develop FORTEN's superior product lines.

## Quality

We Don't just give lip service to quality, WE BACK IT UP. If you purchase our products and that the quality "you expect" is not present, we will refund your money for returned, unused merchandise. This guarantees that you will be absolutely satisfied with any purchase of FORTEN products.

## Services

We are structured in such a way that all of our employees have a vested interest in your satisfaction. Our customer service and courtesy is second to none. We listen to our customers and respect and trust what we hear. We are an adaptive organization that is totally committed to the racquet sports industry.

## Innovation

We have demonstrated a high degree of innovation and will continue to do so. Our series of Gear Strings, Thin Blend, Aramid Composite, Hybrid String, Multi-Tack Grip, and The Worm are a few examples of products that we have introduced innovation to the racquet sports industry. We are committed to sustaining our superior performance in the area over the long haul.

# Aramid Composites Tennis Strings

Forten has been on the cutting edge of developing Aramid Composites for over twenty years. Forten combines the tremendous durability of Aramid fibers with high performance polyamide filaments that produces a quality blend of these quality materials for high performance.

**Aramid fibers** are an aromatic polyamide material containing aromatic and amide group. Forten has developed a unique method of combining Aramid fibers with resilient polyamide copolymer filaments. The result is a tremendous durable string that affords a higher degree of playability than typically found in Aramid strings.

**Aramid fibers** are noted for strength and extreme durability. They behave elasticity in tension with fibrous structure contributing to notching resistance. Aramid fibers are highly durable and ideal for reinforcing racquet strings.

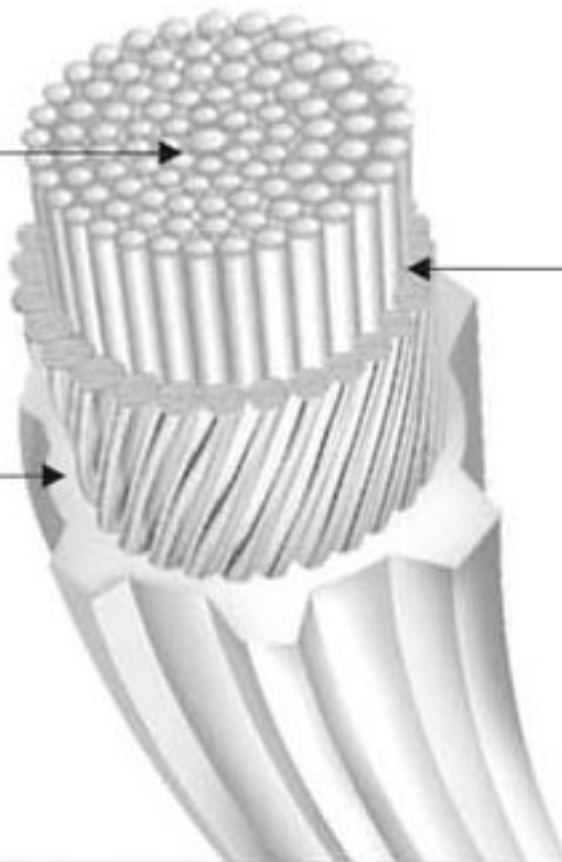

## Aramid Composites

The revolutionary durable Aramid core is wrapped with highly elastic synthetic gut filaments that insure a crisp, quick response.

## Aramid Gear

Our uniquely modified Aramid fiber core insures extraordinary string life.

The Aramid fiber core is wrapped with highly elastic synthetic gut filaments that insure a quick, crisp response.

**Aramid Gear** combines the tremendous durability of Aramid fiber with the revolutionary sharp gear teeth that bite the ball and create unbelievable spin and control.

**Aramid Gear** is a concept that truly adds another dimension to one's game. Players using this concept enjoy a dramatic increase in topspin and slice.

U.S Patent # 5090188

Outstanding spin and control derived from the revolutionary ridged finish. Unbelievably bite

Aramid Composites is usually combined with other soft strings to reduce the string bed stiffness. We recommend lowering the string tension of mains by 15% of the tension that a player would require a string comprised of exclusively to achieve an optimum playability.

# Polyamide Composites Tennis Strings

Nylon strings offer a softer, more natural "feel" than the strings made from more durable materials such as polyester and Aramid fiber strings. Our state of the art manufacturing capability can mix and match ingredients and arrange various gauges of nylon filaments and fibers to produce strings with varying, desirable characteristics that are better suited to an individual player's game style.

Nylon strings are still the core of the racquet sports industry. They play well and are durable and cost effective.

Forten has produced millions sets of Nylon strings over the last two decades and is considered a pioneer in nylon string development.

Forten's expert manufacturing processes have enhanced nylon strings' performance so that the strings emulate the highly desirable characteristics of natural gut without the high cost.

## Sweet 15 (Synthetic Gut)

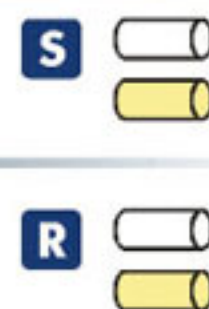

**Gauge:** 15L/1.35mm

	0	5	6	7	8	9	10
Power							
Control							
Durability							
Comfort							

Sweet in the sweet spot, that is! FORTEN uses a specially formulated bonding agent in the development of this 15L gauge synthetic gut. SWEET efficiently returns energy to the ball during serve and volley play for livelier response without tension loss. Its tensile strength allows it to take the pounding of a baseline rally.

**Colors:**

## Sweet 16 (Synthetic Gut)

**Gauge:** 16G/1.30mm

	0	5	6	7	8	9	10
Power							
Control							
Durability							
Comfort							

Sweet in the sweet spot, that is! FORTEN uses a specially formulated bonding agent in the development of this 16G gauge synthetic gut. SWEET efficiently returns energy to the ball during serve and volley play for livelier response without tension loss. Its tensile strength allows it to take the pounding of a baseline rally.

**Colors:**

## Sweet 17 (Synthetic Gut)

**Gauge:** 17G/1.25mm

	0	5	6	7	8	9	10
Power							
Control							
Durability							
Comfort							

Our sweetest sweet spot! This is Forten's most playable synthetic gut hands down. The unique, specially formulated bonding process employed in the manufacturing of our SWEET 16 is used in the development of this thinner gauge string, resulting in increased energy return to the ball and an even livelier response without loss of tension.

**Colors:**

## Omni Spin

**Gauge:** 15L/1.35mm

	0	5	6	7	8	9	10
Power							
Control							
Durability							
Comfort							

Designed for spin control. Omni spin has several unique attributes unseen in other strings on the market. With its rough textured construction and high quality materials, Omni Spin provides necessary characteristics to promote optimal topspin, slice, backspin, performance and control for its player.

\*Due to the pronounced texture, when stringing, move cross strings up and down while pulling in order to reduce friction and possible twisting.

# Polyamide Composites

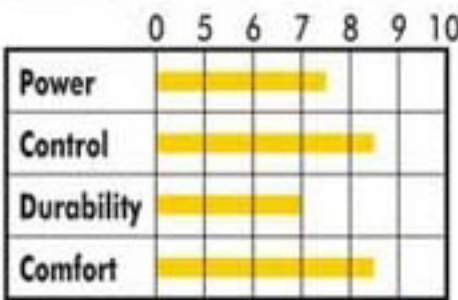

## Tennis Strings

### Dynamix 16G (Premium Syn Gut)

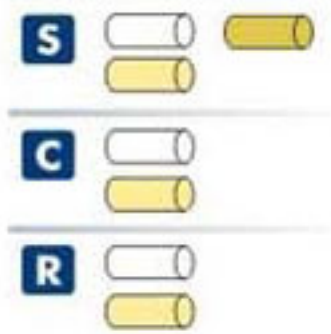

**Gauge:** 16G/1.30mm

DYNAMIX 16G is a durable blend of three premium grades of copolymer filaments that produce a high performance synthetic gut. This dynamic union results in a resilient, powerful string that is in a class by itself. DYNAMIX 16G is a competition string that enhances all phases of the game of tennis.

**Colors:**

### Dynamix 17G (Premium Syn Gut)

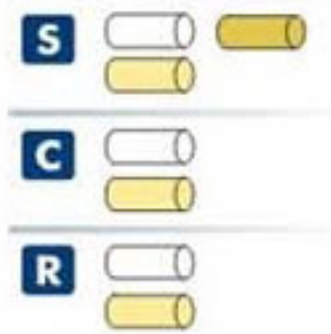

**Gauge:** 17G/1.20mm

DYNAMIX 17G is a blend of three premium grades of copolymer filaments that produce a high performance synthetic gut. This dynamic union results in a resilient, powerful string that is in a class by itself. DYNAMIX 17G is a competition string that enhances all phases of the game of tennis.

**Colors:**

### Tie Gut 16G

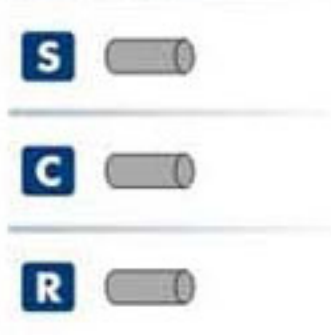

**Gauge:** 16G/1.30mm

Tiegut is a uniquely constructed high performance string. The highest quality micro Nylon 66 fibers are tightly twisted to produce a core with characteristics that mimic natural guts. This core is protected and enhanced by a wrap of micro copolymer monofilaments coated with titanium for added durability. The result is a string that gives incorporating control and comfort expected from natural gut. It is easy on the arm and tough on opponents. It is suitable for all types of racquets.

**Colors:**

### Spin Gear

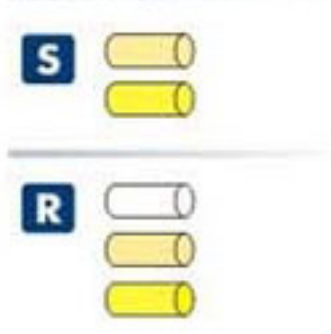

**Gauge:**

**Core:** 17G/1.20mm **Teeth:** 15G/1.40mm

Finally, a string that tames the power game. SPIN GEAR, an ultra playable string that is recommended for the cagey player who enjoys finesse and touch string. (Not recommended for the power game.) This combination will provide you with a long lasting bonus of quality tennis.

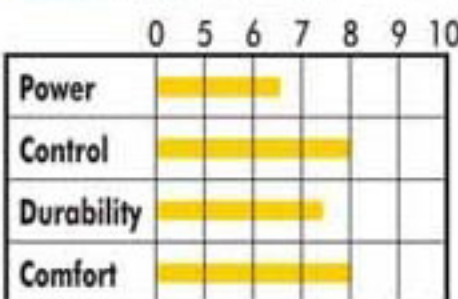

**Colors:**

### Competition Nylon 15L

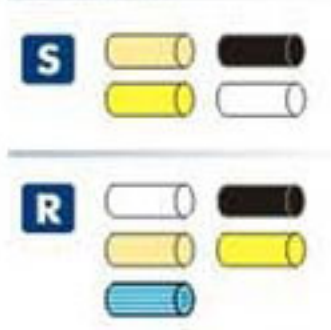

**Gauge:** 15L/1.35mm

COMPETITION NYLON, the economical choice. A tough string that lasts. Polyamide filaments twisted around the center core help this 15L nylon outperform any string in its price range.

COMPETITION NYLON features an antiabrasive coating that results in a very durable string.

**Colors:**

### Competition Nylon 16G

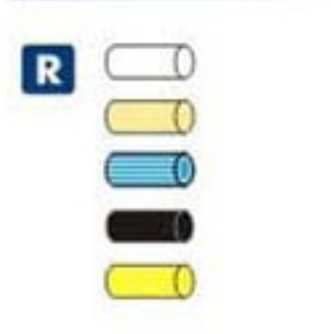

**Gauge:** 16G/1.30mm

COMPETITION NYLON, the economical choice. A tough string that lasts. Polyamide filaments twisted around the center core help this 16G nylon outperform any string in its price range.

COMPETITION NYLON features an antiabrasive coating that results in a very durable string.

**Colors:**

# Poly Blends Tennis Strings

Polyester strings are typically more durable than nylon strings and less stiff than Aramid strings. Many players like this alternative due to its high degree of durability and power. These strings can be made by blending polyester material with varying ingredients to provide power, more durability, and consistent play under any type of weather condition. The Forten line of Poly Blends, the advanced co-polyester strings, has been developed from a recipe that is proprietary and produces outstanding performance and power. Our state of the art manufacturing facility and research department focus on constantly upgrading our line so that we provide the most resilient, elastic, high performance products available.

# Hybrid Synergy **Tennis Strings**

## **Hybrid Synergy (1 + 1 = optimum performance)**

A hybrid consists of a string bed with two different strings for the mains and crosses. The mains run parallel to the racquet handle and the crosses run perpendicular to the racquet handle in the racquet frame.

The main strings are the primary determinant of playability during competition. The main strings in a racquet usually break before the cross break due to movement of the main strings during competition. When a durable string, such as an Aramid string or polyester string is used for the mains and a more elastic string is used for the cross strings in a hybrid configuration, the result is durable main strings backed by softer, more responsive cross strings.

Additionally, there is a cost savings to the hybrid configuration because the cross strings can be a less expensive string (usually nylon). The cross strings can be a very thin gauge string which opens up the overall string pattern in the racquet and introduces more top spin into the player's game style.

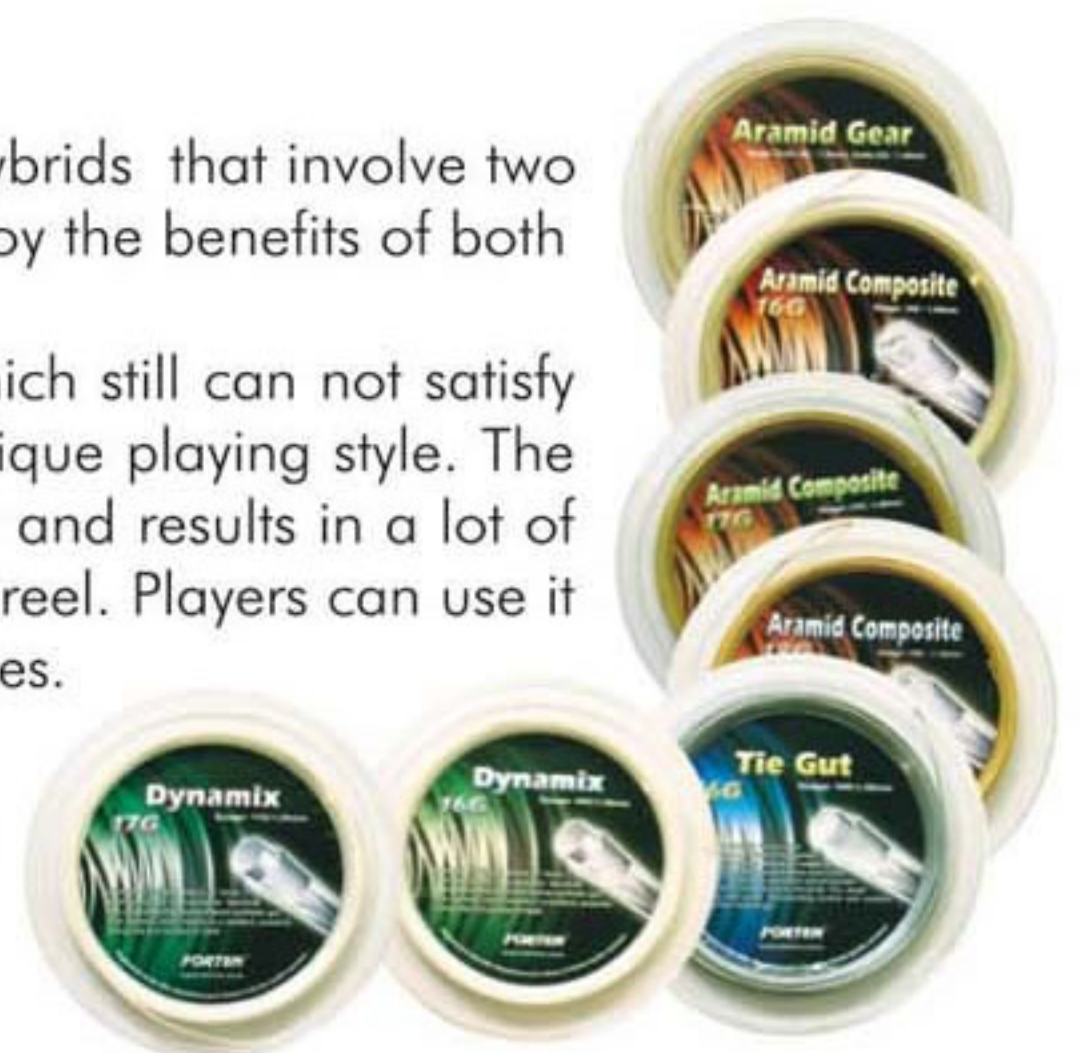

## **44-foot reel package:**

More and more players have resorted to developing hybrids that involve two different types of strings. This allows the players to enjoy the benefits of both strings performances.

There are numerous pre-packaged hybrids in the market which still can not satisfy the players' needs. Players want hybrid tailored to their unique playing style. The normal 40-foot string-set is not long enough for two mains and results in a lot of string waste. Forten introduces a 44-foot string-set in a small reel. Players can use it for a regular set and also can use it for two mains or two crosses.

Forten offers 44 foot length sets so that players' imagination can combine two different types of strings to create a hybrid combination in a synergistic fashion that suits unique playing style.

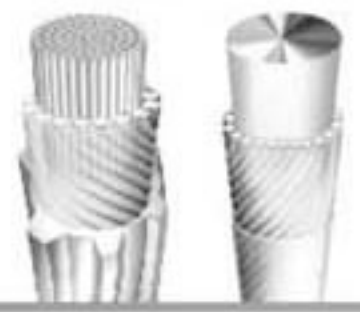

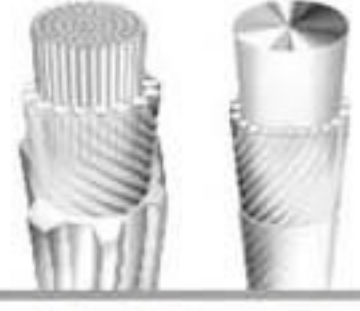

## **Let's get REEL creative!**

Forten offers 660 feet reels, 44-foot mini reels on many types of strings. BE REEL CREATIVE and develop hybrid combinations tailored individual players' needs and satisfaction.

# Hybrid Synergy Tennis Strings

Based on our intensive test, Forten offers following quality pre-packaged hybrid strings:

	<h3>Aramid Gear Hybrid</h3> 	<p><b>Gauge:</b></p> <table border="1"> <thead> <tr> <th></th> <th>0</th> <th>5</th> <th>6</th> <th>7</th> <th>8</th> <th>9</th> <th>10</th> </tr> </thead> <tbody> <tr> <td>Power</td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>Control</td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>Durability</td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>Comfort</td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>		0	5	6	7	8	9	10	Power								Control								Durability								Comfort								<p><b>Main:</b> Core:16L/1.25mm Teeth:15G/1.40mm <b>Cross:</b>16G/1.30mm</p> <p>Players wanting more durability without sacrificing good spin and control will love Aramid GEAR. # Racquetball String

The FORTEN line of racquetball strings covers the gamut of desirable characteristics. FORTEN takes extreme pleasure in announcing the most formidable and complete line of racquetball strings available anywhere. They are top of the line strings without a top of the line price. Features are strings that will satisfy the needs of every player. A myriad of options are represented that range from controlled power to application of guile and finesse.

## Finesse

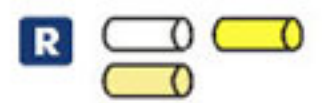

**Gauge:**                      **Core:** 17G/1.20mm                      **Teeth:** 15G/1.40mm

	0	5	6	7	8	9	10
Power							
Control							
Durability							
Comfort							

This string is constructed like no other. It has a 17 gauge exposed core with a 15L overall external gauge defined by the gear teeth. The unique texture that results takes the edge off from the opponents' power game. The gear teeth impart spin power to the ball thus adding a totally new dimension.

**Colors:**

## Pros Choice

Perfect for all types of racquet sports, golf clubs and baseball bats.

## Ridged Grip

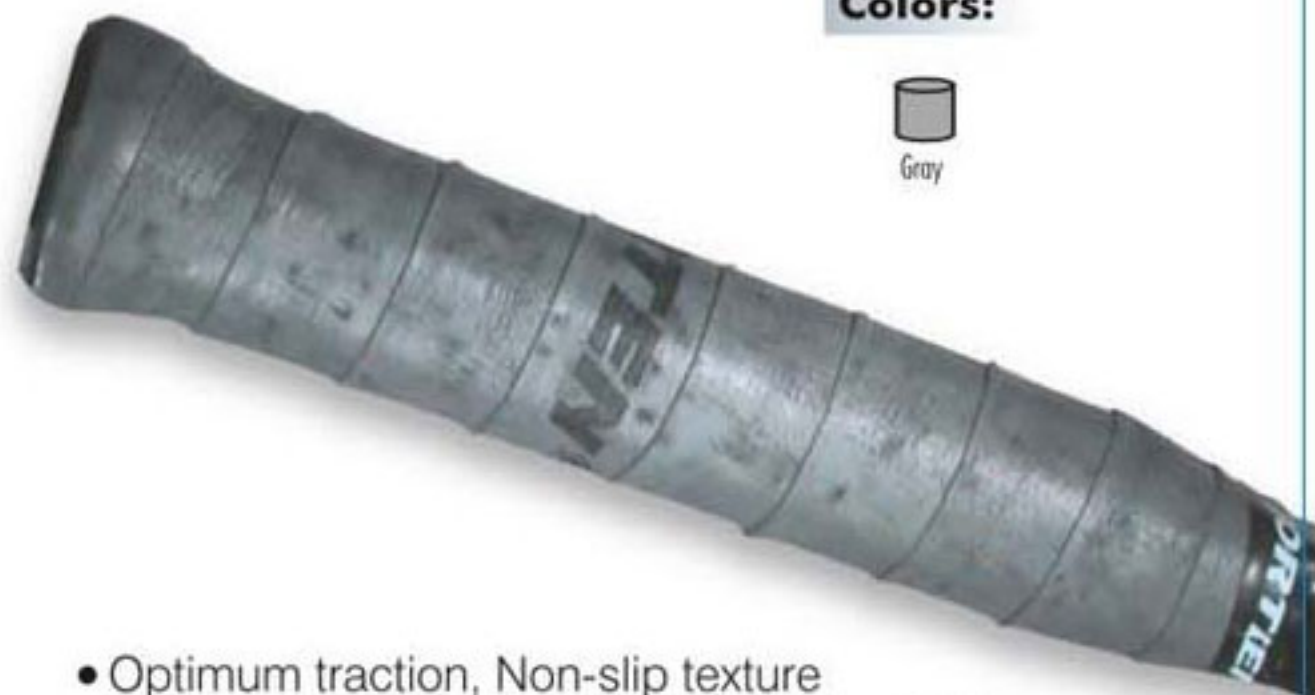

### Colors:

The foam ridge in RIDGED GRIP provides an extra measure of control. RIDGED GRIP is a comfortable, absorbent overwrap that helps you keep a firm grip during the toughest matches.

Perfect for all types of racquet sports, golf clubs and baseball bats.

## Wrap Tack-Pro

### Colors:

- Optimum traction, Non-slip texture
- Help dampen Vibration and reduces shock.
- Ultra absorbent
- Tear resistant material
- Available for a Jar in 15 pcs Grips & 60 pcs Grips

Perfect for all types of racquet sports, golf clubs and baseball bats.

# Leather Grip and Multi-surface Grip

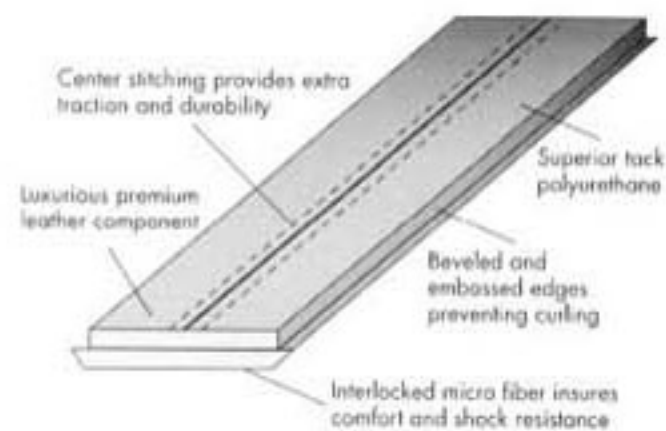

The use of leather has become a status symbol of success. Reward yourself with the luxurious extravagance of leather. Leather is a more durable material than most synthetics used in the grip industry.

## Multi-Tack Grip (U.S. Patent #6261191 B1)

Two superior grip materials are blended together on the surface to combine the outstanding properties of each one for optimum performance. The premium leather component is a natural performer with outstanding durability. The super tack component of our Cushion Tack eliminates slippage and assures a firm grip. The Multi-Tack grips usher in a new generation of grip developed using state of the art technology.

### Colors:

## The Premium Leather

The Premium Leather is a grip made from luxuriously soft top grain calfskin leather with a beautiful finish. Its rich suede-like touch makes it not only tacky, but also a sensational experience.

Perfect for all types of racquet sports, golf clubs and baseball bats.

### Colors:

## Razorback The Quality Leather

The Quality Leather RAZORBACK is a very durable leather grip made from pigskin. Its felt backing not only creates a great touch, but also further increases the grip's absorbing qualities. The naturally large pores of the top grain leather contribute to its excellent traction.

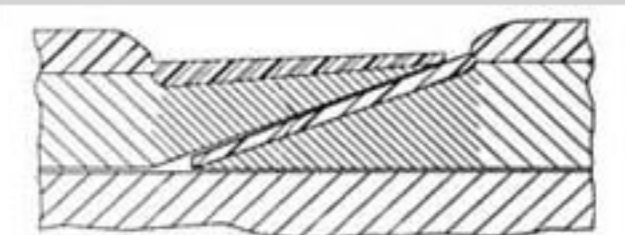

Perfect for all types of racquet sports, golf clubs and baseball bats.

### Colors:

## Condensed and beveled edges of sport grips U.S. Patent # 5851632

Condensed and beveled edges are easily installed with a consistently overlapping spiral. The overlapping area is not thicker than the remainder of the grip and leads to increased traction. Condensing and beveling the edges also effectively eliminates the rolling up of the grip's edges, translating into durability, easy maneuverability and superior control.

# Replacement Grip

The FORTEN Grip Family presents a new generation of synthetic grips. These grips are produced of our proprietary compound using state-of-the-art machinery. Our grips are made by coating a layer of thermoplastic compound on micro-fiber felt. Both layers provide good cushioning and absorbing qualities. The top layer of thermoplastic is impregnated with a special compound to provide better tackiness, durability and comfort. Each grip is precisely cut and beveled to a consistent dimension. FORTEN's extensive experience in grip technology translates into beautiful performance in sports events.

## Cushion Tack

CUSHION TACK features a soft, absorbent finish that is cushioned with interlocked nylon micro-fiber for extraordinary comfort and shock dampening. It is a highly absorbent grip that renders optimum traction. The CUSHION TACK features condensed and beveled edges. These eliminate the rolling up of the grip edges, so that the adherence between the handle and the player's hand is not corrupted.

*Perfect for all types of racquet sports, golf clubs and baseball bats.*

### Colors:

## Cushion Tack Air Vent

CUSHION TACK Air Vent employs a perforation technique that ventilates the grip. This technique results in absorption and accelerates dehydration during and after usage.

*Perfect for all types of racquet sports, golf clubs and baseball bats.*

### Colors:

## Pro-Trac

A unique embossed pattern provides the most comfortable, non-slip grip available.

*Perfect for all types of racquet sports, golf clubs and baseball bats.*

### Colors:

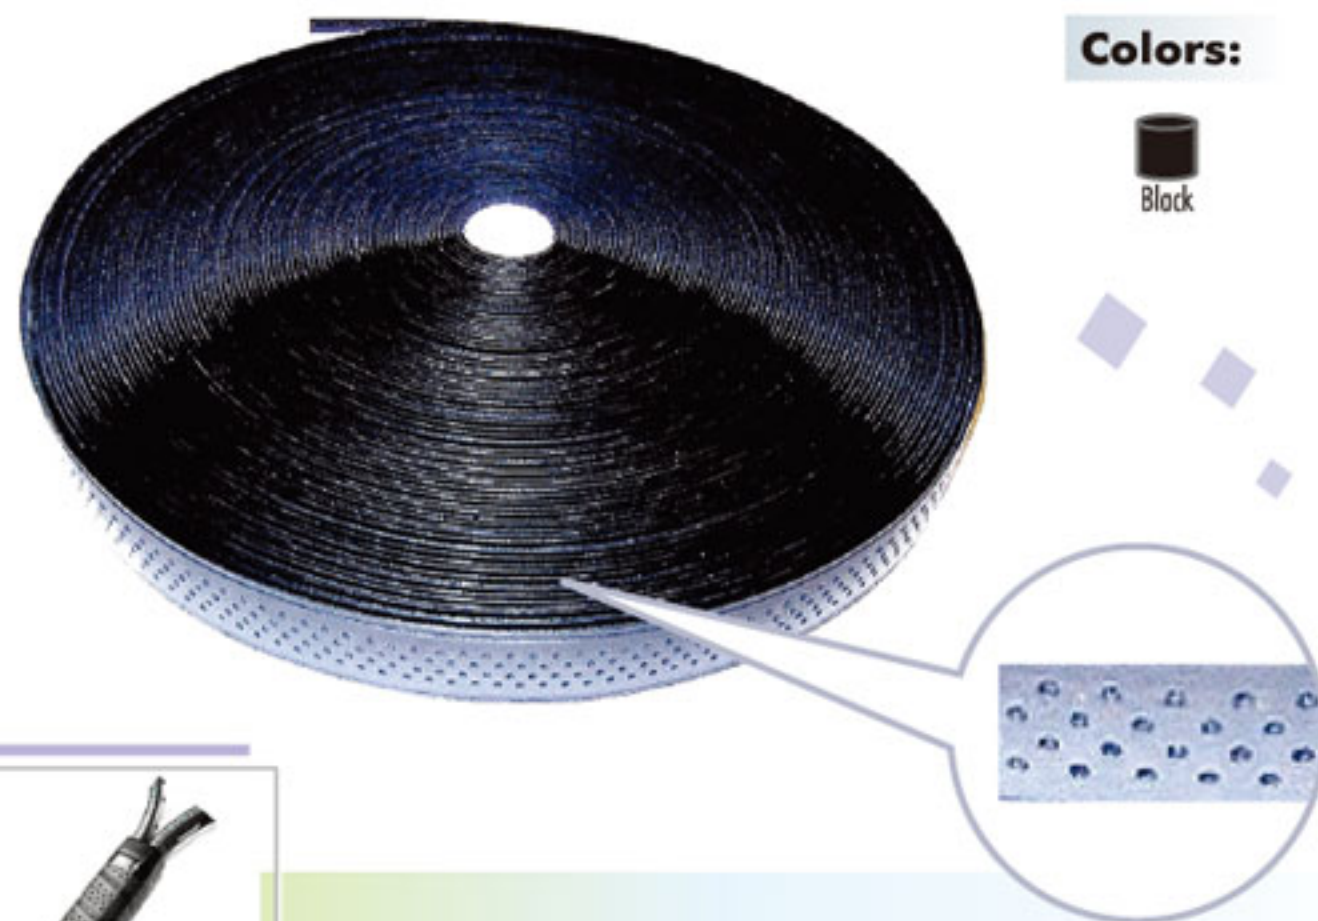

# 150ft Continuous Grip Roll

The Grip roll represents a 150-foot continuous roll of finished grip material. The roll can then be tapered and cut to any desired length. It is sufficient to apply finished grips to about 45 tennis racquets, 46 baseball bats, 62 racquetball racquets, or 65 badminton racquets.

Each roll is 150 feet in length and 1" in width. The backing material has an adhesive finish for ease in application of a grip. Each roll has our patented embossed edges which make application easier and prevent curling of the edges.

## Sport Grain Grip

The Sports Grain grip roll is made from the highest grade of polyurethane synthetic leather. It is highly shock absorbent and cushioned for comfort. The backing material is premium grade non-woven cloth which insures a tight secure fit. The most outstanding feature is an extra tacky surface that is finished with the Sport Grain texture (this is the same texture on footballs and basketballs). This texture insures ultra enhanced grip ability and sharply reduces torque.

**25mm x 150 feet x 1.6mm**

## Cushion Grip

The Cushion grip is made of our proprietary compound on a shock absorbent cushioned micro-fiber felt. This Grip employs a perforation technique that ventilates the grip and increases the friction of the surface. This technique results in absorption and accelerates dehydration during and after usage.

**25mm x 150 feet x 1.6mm**

## Spectra Worm

**Vibration Damper**  
(U.S. Patent # 5149090)

- Patented construction surrounds strings for optimum vibration dampening.
- Silicon composition provides the highest degree of durability.
- Resistant to the sun's harmful rays.

# Accessories

## Mainstays

Mainstays are the ideal accessory for players who hit with a high degree of topspin. They reduce mainstring movement so that friction burn is virtually eliminated. They are designed to be highly effective with the least amount of tension gain compared to similar type products. The high grade nylon composition is synergistic with the string bed. The circular configuration of the attachment device promotes efficient installation. Enhance your sweet spot with Mainstays.

## Ball Clip

Tennis ball holder made of molded nylon. Easy to clip onto shorts or skirts.

## Protection Tape

Protects racquet from nicks and scrapes.

### Colors:

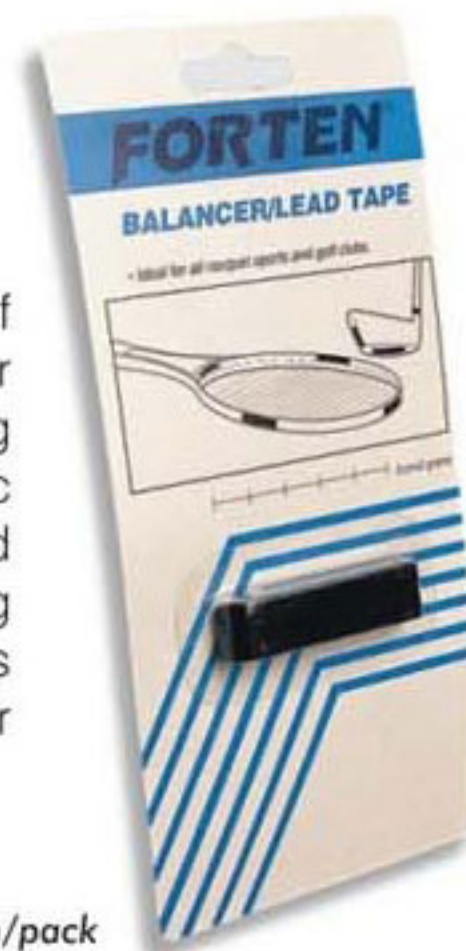

35 mm x 4550 mm

25 mm x 4550 mm

## Balancer/Lead Tape

Alter your racquet or golf club's balance to suit your individual needs. Adding lead tape to strategic locations stabilizes and adds power while reducing shock. Performance is enhanced and potential for injury is reduced.

## Sport Bags

These bags are constructed of the highest quality nylon with water proof PVC backing. They are secured by heavy duty nylon clasps and buckles with YKK zippers and feature a strong heavy duty polypropylene strap.

**The Forten Thermal Bag** is a 30" long by 7.5" wide bag that will comfortably accommodate 6 racquets. It has an outside accessory pouch and two large wet pockets inside.

**The Forten Tour Bag** is a 29" long by 12.5" high and 12" wide. It has two large side pockets and a large front wet pocket.

**The Forten Briefcase** is a 15" long by 11" wide bag. Five zippered compartments with one of the compartments tailored to hold pens, business cards, cell phones, palm tops, etc.

# Court Equipment

## Spin Dry

**Forten's Spin Dry** drying system is the most technologically advanced, best performing roller system available. It quickly removes water from tennis court and golf greens.

The unique absorption properties of polyvinylalcohol (PVA) seamless roller create an ultra tight seal that pushes the water off of surfaces quickly and effectively without streaking. Our PVA material is the most durable available for a long lasting efficient product life.

The frame and handle are constructed using an ultra durable Super Aluminum Alloy that is light weight, completely rust free outperforms and outlasts steel units. The engineering and design used to develop this product are without peer.

• Dry your court in no time

• Quickly removes large amount of water from golf greens

**PVA replacement rollers are available for the Spin Dry unit or other exiting units currently in use.**

3.25" roller with durable plastic tubing

1/2" thickness seamless polyvinylalcohol foam bonded to a 36" long, 2 1/4" diameter PVC core.

## Forten Tennis Nets

Forten offers two types of tennis nets that meet or exceed the desired characteristic in a net. The nets both have the following features:

- 34 ounces vinyl headband.
- 4 rows of weather resistant tough polyester stitchings.
- Heavy duty black vinyl border tapes.
- Traditional wooden dowels support each end.
- Industrial strength steel cable coated with protective white vinyl.
- Polyethylene net twine for installation ease.

## Scorekeeper

The Scorekeeper clamps easily to any size tennis post. This sturdy steel unit comes with a swivel base that rotates the score. The game and set number are made from hard durable plastic.

### Game numbers:

Size: 4" X 7"

Available in sets of 1-6 or 1-9

### Set numbers:

Size: 3" X 5"

Available in sets of 1-3

### Forten All Court

This is our most popular tennis net. The net body is comprised of 3.5mm polyethylene. The construction is traditional and meets or exceeds all industry standards.

### Forten All Court DT

Built to withstand punishing serves, this 3.0 mm polyethylene net has an additional top six rows of netting that are double meshed below the headband. The construction is traditional and meets or exceeds all industry standards.

## Center Strap

Forten Center Straps are constructed using a heavy duty weather resistant polyester material. Two styles are available. One style has a stainless steel buckle and the other style has a Velcro fastener.
